PROFILE

Results-oriented Full Stack Developer with experience in JavaScript, HTML/CSS, Developer Tools and DOM Manipulation as well as Python and Django, backed by a proven track record in successful project management and websites creation. Familiar with UI/UX principles.

Adept at bridging the gap between Product teams, Operations, Design and Marketing departments. Seeking challenges that will hone acquired knowledge and leverage existing cross-functional experience to provide a development process.

WORK EXPERIENCE

Frontend Developer

Eventact company   2023 - present

- Implemented website's (English and Hebrew versions) re-design and upgrade using HTML, CSS, Bootstrap, and JavaScript. Created content (articles and images).

Project Manager

Rose Marketing Agency   2014 - 2022

- Led cross-functional teams in executing projects, ensuring adherence to timelines, scope, and budget, resulting in increased client satisfaction and fulfillment of KPIs.
- Created and modernized client websites/landing pages as a project manager, enhancing technical, content, and design aspects, which lead to improved user experience, increased conversion rates, and overall improvement.
- Proposed, negotiated and managed 360 degrees marketing campaigns for global companies.

Website Product Manager

Kurchatov State Nuclear Institute   2013 - 2014

- Identified and resolved errors in the institute's website, proposing innovative solutions to improve efficiency, enhance user experience, and streamline workflows.
- Actively contributed to the development and enhancement of the website, resulting in improved performance and reduction in overall error incidents.
- Led a team in creating an English version of the website with a completely different structure, design, and content, as well as a new company portal.
